## DECORATIVE LIGHTING FOR THE HOME

FOR centuries burning fuel provided artificial light, long inconveniently used purely as a utility. The invention of the incandescent electric lamp was the realization of a long-hoped-for light source, easily controlled. At present the value of artificial light, aside from its importance as an aid to vision, is acknowledged in some degree by the many millions enjoying its convenience.

Of all the furnishings used in the home, light is the easiest to bend to the will. It offers a sure means of reflecting personalities in surroundings. It may be brilliant and sparkling, dainty and colorful, or subdued and intimate. When rightly employed, it brings out the best in each room, and combines the various objects into the united effect so desirable.

Illumination occupies an important place in the decoration of the home, and is rightly considered a part of the furnishings. Whenever furnishings are changed or rooms re-decorated the introduction of lighting equipment to conform with the new appointments should be considered.

Lighting glassware is a most convenient means for directing light and controlling color and its intensity as desired. The decorated glassware shown in this catalog follows modern tendencies in interior decoration. Color, used extensively in draperies, wall paper, rugs and furniture, is afforded in sufficient abundance and variety in Ivanhoe color-decorated bowls and shades, designed to fit illumination into the home as an appropriate and harmonious part of the furnishings.

## VELURIA

Veluria is the name applied to a particular texture of Ivanhoe illuminating glass. It is a beautiful white opal which reveals a rosy amber glow or "fire" when lighted. Veluria glass is shown in this catalog decorated with Rozelle patterns Nos. 291, 292, 332, 226, 227, 434, page 14 and pages 16 to 21.

## IVRE

Ivre, one of the most beautiful of the Ivanhoe glasses, is named from its resemblance to old ivory. The tone is due to the texture of the glass and not to any material applied externally. It furnishes a soft, subdued illumination which is especially appropriate for emphasizing the cozy, intimate spirit of the home. Ivre glass is shown in this catalog with Rozelle color decorations No. 293 and No. 294, and with etched design No. 407, pages 22, 23 and 24.

## YURAL

Yural is the name of a dense opal glass, having a flat white effect when unlighted. It is well suited for sand blasting and color decoration. Yural glass is shown in this catalog with Rozelle decoration No. 416, page 9.

## CRYSTAL

Crystal glass is clear, transparent glass suitable for sand blasting, etching and color-decoration. Crystal glass is shown decorated with Rozelle designs Nos. 337, 338, 339, 409, 410, 412 and 433, pages 10 to 15, 24 and 25.

## ROZELLE

Rozelle is the name of the color decorations applied by a special process to Veluria, Ivre, Crystal and Yural glass. Rozelle designs have the pure artistic color qualities of the best hand-painted work, and are

superior to most hand painting. The colors are permanent. Bowls and shades ornamented with Rozelle are very attractive when the glass is unlighted, and when lighted the patterns blend into a soft, radiant color harmony. Rozelle color-decorated glassware is distinctive, individual, of highest quality.

Color illustrations in this book are reasonably accurate in color values.

## AN ABUNDANCE OF LIGHT, WELL SHADED

The moderate cost of incandescent electric lamps and their operation permits an abundance of light in practically all homes. But light alone will not provide conditions most desirable and necessary to good vision, pleasing effects and the appearance of the lighting equipment.

An abundance of light is the first essential to proper lighting. To realize fully the utilitarian and decorative adaptations of light in the home, provision must be made for avoiding glare from bare lamps by directing and diffusing the light. Ivanhoe color-decorated glass bowls and shades are well suited to this purpose.

The variety of colors and designs in which Ivanhoe Rozelle decorated lighting glassware is obtainable permits a choice which will harmonize with a wide range of decorative plans. Used with lamps of proper size, it assures the realization of the modern standard of lighting for all classes of homes, aptly expressed as "an abundance of light, well shaded."

## ILLUSTRATIONS

On the following pages are shown in full color all Rozelle decorations available; where all shapes in which decorated pieces are available are not shown in colors, the complete variety is shown on succeeding pages.

For information relative to sizes refer to pages 26 to 30.

## THE IVADINE

The Ivanhoe Ivadine supplies that combination of abundant light and soft color tints so desirable in dining room illumination, yet heretofore difficult to obtain. When the Ivadine is lighted a cone of white light completely floods the table. The remainder of the room is toned with soft, warm light, bringing the table, furnishings and decorations into pleasing harmony.

Lighted or unlighted, the Ivadine is a beautiful ornament of distinctive lines and style. One unit of Ivre glass with etched designs and

three of Crystal glass with attractive color decorations are shown on the opposite page. Ivre glass reveals warm colorings of pleasing character and the etched decoration greatly enhances its beauty.

When lighted, the Ivadine produces a most pleasing effect. Shining silver and glass, snowy linen and colorful viands are displayed to their fullest attractiveness in the white light which floods the table. At the same time, abundant tinted light beautifully illuminates the remainder of the room, creating a soft, harmonious background for the handsomely color-decorated Ivadine itself.
